

Wallester UC4 - the 14 cases, in full

Generated 2026-09-28 06:41 UTC from kb/ at **kb-2026.09-poc-v10** and from a database built by running `tools/run_demo.py` end to end. **14 cases**.

Do not edit this file by hand - it is regenerated by `python tools/make_case_guide.py`, and `tests/test_case_guide.py` checks its figures against the database.

All 14 cases at a glance

How to read this guide

Every case in the demo set exists to exercise one specific behaviour of the pipeline. This guide walks each of them from the application arriving to the decision being recorded.

Nothing here was typed by hand. Every figure, rule id, verdict and message is read out of the knowledge base files or out of the database after a full run, so the guide cannot drift away from what the system actually does.

Each case has the same ten sub-sections:

A. Classification	which rule decided what kind of applicant this is, and why the earlier rules did not match
B. Checklist	every document the case was asked for, and whether it arrived
C. Documents	the quality verdict on each file, and every value read from it
D. People and ownership	who is involved, and the ownership arithmetic
E. Checks	the registry, identity and screening results
F. Risk	every factor considered, the points, the band, and any floor
G. Decision	what was offered, what was recorded, and by whom
H. Communications	every message the applicant received, in full
I. Timeline	the complete audit trail
J. Dashboard line	the row an operations team sees

Some terms appear throughout:

- A **hold** is a lock placed by one step. Only that step, or the named person it belongs to, can release it, and the case moves only when every hold is clear. Clearing one hold can surface another.
- A **band** is the risk bucket: low, medium, high, critical, or *insufficient evidence* when there is not enough to score at all.
- A **hard floor** is a rule that forces a minimum band regardless of the score.
- A **restricted finding** means the case carries something the applicant may not be told, so only generic customer wording is available to it.
- The **confidence floor** is the level below which a value read from a document goes to a person rather than into a decision.

The eight steps every case passes through, in order: intake, requirement pack, document quality, extraction, verification, screening, risk assessment,

decision. **Steps 5 and 6 are the paid ones** - a case that stops before them has cost nothing.

The knowledge base itself is printed in the appendix at the end.

WAL-ONB-0001 - Kaari Mets

Freelance graphic design and brand identity services · sole_trader in EE, registered as EE-FIE-4410932 · expected usage: One card; up to 4000 EUR per month on software and travel

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	sole_trader
programme_type	direct
ownership_layers	0
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self_employed	freelancer_sole_trader	MATCHED - this rule decided the case
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	not checked - an earlier rule already matched
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	not checked - an earlier rule already matched

Result: freelancer_sole_trader, **route** primary, **by rule AT-02**. Individuals trading on their own account (Section 5.1)

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
EE	EE	wallester_as	true	—

B. Checklist

Step 2 builds this from `kb/requirement_rule.csv`, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000001	RULE-0001	entity proof	registry extract	required	the company	—	—	accepted
CHK-000002	RULE-0002	individual identity	id document	required	Kaari Mets	—	—	accepted
CHK-000003	RULE-0003	individual identity	proof of address	required	Kaari Mets	—	—	accepted
CHK-000004	RULE-0004	individual identity	liveness selfie	conditional	Kaari Mets	remote onboarding without in-person verification	not answered	accepted
CHK-000005	RULE-0005	source of funds	source of funds declaration	required	the company	—	—	accepted
CHK-000006	RULE-0006	business model	business activity description	required	the company	—	—	accepted
CHK-000007	RULE-0007	risk specific	website or platform details	optional	the company	—	—	pending

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	5	5	0	0	—
conditional	1	1	0	0	—
optional	1	0	0	1	website or platform details

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0001	ee_fie_registry_extract_mets.pdf	registry extract	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0002	passport_mets_k.jpg	id document	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0003	utility_bill_aug2026_mets.pdf	proof of address	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0004	liveness_capture_20260901_mets.jpg	liveness selfie	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0005	source_of_funds_mets.pdf	source of funds declaration	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0006	business_activity_mets.pdf	business activity description	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

Field	From	Name	Value	Confidence	How it was handled
FLD-0001	ee_fie_registry_extract_mets.pdf	company_name	Kaari Mets	0.97	above the floor
FLD-0002	ee_fie_registry_extract_mets.pdf	registration_number	EE-FIE-4410932	0.96	above the floor
FLD-0003	ee_fie_registry_extract_mets.pdf	registered_address	Kastani 12-4, 51006 Tartu, Estonia	0.93	above the floor
FLD-0004	ee_fie_registry_extract_mets.pdf	entity_status	active	0.95	above the floor
FLD-0005	passport_mets_k.jpg	full_name	Kaari Mets	0.98	above the floor
FLD-0006	passport_mets_k.jpg	date_of_birth	1991-03-14	0.97	above the floor

Field	From	Name	Value	Confidence	How it was handled
FLD-0007	passport_mets_k.jpg	document_number	EE-P-3391842	0.94	above the floor
FLD-0008	passport_mets_k.jpg	expiry_date	2031-04-18	0.96	above the floor
FLD-0009	utility_bill_aug2026_mets.pdf	full_name	Kaari Mets	0.95	above the floor
FLD-0010	utility_bill_aug2026_mets.pdf	address	Kastani 12-4, 51006 Tartu, Estonia	0.92	above the floor
FLD-0011	utility_bill_aug2026_mets.pdf	document_date	2026-08-12	0.94	above the floor
FLD-0012	utility_bill_aug2026_mets.pdf	issuer	Tartu Energia AS	0.91	above the floor
FLD-0013	source_of_funds_mets.pdf	declared_source	Client invoices from retained design work	0.89	above the floor
FLD-0014	source_of_funds_mets.pdf	expected_monthly_volume	4000 EUR	0.88	above the floor
FLD-0015	business_activity_mets.pdf	declared_industry	Graphic design services	0.90	above the floor
FLD-0016	business_activity_mets.pdf	expected_card_usage	Software subscriptions, print suppliers, travel	0.87	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0001	Kaari Mets	sole trader	1991-03-14	EE	EE

The threshold is **25%**: at or above it, an owner must be verified.

No beneficial owners are declared on this case.

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub EE	active	pass	0.96	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Kaari Mets	Kaari Mets	match
registration number	EE-FIE-4410932	EE-FIE-4410932	match
registered address	Kastani 12-4, 51006 Tartu, Estonia	Kastani 12-4, 51006 Tartu, Estonia	match
directors	Kaari Mets	—	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0001	Kaari Mets	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0001	the applicant entity	no_match	no_match	none	none	—
SCR-0002	Kaari Mets	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

no factors fired = 0

What	Value
Score	0
Band the score alone would give	low (0-24)
Hard floors that applied	none
Final band	low
Recommended action	approve
Human sign-off required	no

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band low:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	offered	low, medium	analyst	approved
conditional_approve	2	offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	not offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	not offered	medium, high, critical	analyst	rejected

No decision has been recorded on this case.

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0001
Template	TPL-0005
Situation	status_update
Audience	applicant
Type	status_update
Approval	approved, by ops.queue
Sent	sent

Hello Kaari Mets, we have received your application for Kaari Mets and all of the documents we asked for. Your case reference is WAL-ONB-0001. Your application is now with our onboarding team and we will let you know as soon as the review is complete.

I. Timeline

Every audit event on this case, oldest first - **31 in total**. The actor says who acted: system for the orchestration, ai_agent for a model, external_provider for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0001	Kaari Mets	freelancer_sole_trader	ready_for_decision	analyst	low	0	0	—	0

WAL-ONB-0002 - Northbridge Craft Supplies Ltd

Wholesale of craft and hobby supplies to independent retailers · private_limited_company in GB, registered as UK-99010288 · expected usage: Up to 12 cards; around 25000 GBP per month on stock and logistics

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	0
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 0
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, **route** primary, **by rule AT-06**. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
GB	UK	wallester_uk_ltd	true	—

B. Checklist

Step 2 builds this from `kb/requirement_rule.csv`, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000008	RULE-0051	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000009	RULE-0052	entity proof	registry extract	required	the company	—	—	accepted
CHK-000010	RULE-0053	entity proof	tax registration certificate	conditional	the company	company is VAT registered	Fa lse	waived
CHK-000011	RULE-0054	directors officers	director register	required	the company	—	—	accepted
CHK-000012	RULE-0055	directors officers	authorised signatory list	required	the company	—	—	accepted
CHK-000013	RULE-0056	directors officers	board resolution	conditional	the company	authorised signatory is not a registered director	Fa lse	waived
CHK-000014	RULE-0057	ownership ubo	ubo declaration	required	the company	—	—	pending
CHK-000015	RULE-0058	individual identity	id document	required	Denton Halliwell	—	—	resubmission_requested
CHK-000016	RULE-0058	individual identity	id document	required	Priya Nankivell	—	—	accepted
CHK-000017	RULE-0059	individual identity	proof of address	required	Denton Halliwell	—	—	accepted
CHK-000018	RULE-0059	individual identity	proof of address	required	Priya Nankivell	—	—	accepted
CHK-000019	RULE-0060	individual identity	liveness selfie	conditional	Denton Halliwell	remote onboarding without in-person verification	not answered	pending
CHK-000020	RULE-0060	individual identity	liveness selfie	conditional	Priya Nankivell	remote onboarding without in-person verification	not answered	pending
CHK-000021	RULE-0061	source of funds	source of funds declaration	required	the company	—	—	accepted
CHK-000022	RULE-0062	business model	business activity description	required	the company	—	—	accepted
CHK-000023	RULE-0063	risk specific	bank statement	conditional	the company	expected monthly card spend above 50000 EUR	Fa lse	waived

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	11	9	0	2	id document, ubo declaration
conditional	5	0	3	2	liveness selfie
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0007	cert_incorporation_northbridge.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0008	registry_extract_northbridge.pdf	registry extract	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0009	director_register_northbridge.pdf	director register	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0010	signatory_list_northbridge.pdf	authorised signatory list	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0011	director_id_halliwell_scan.jpg	id document	resubmission_required	resubmission_required	blurred_unreadable	QR-07 (ai)	document_unreadable	—
DOC-0012	passport_nankivell_p.jpg	id document	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0013	poa_halliwell_jul2026.pdf	proof of address	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0014	poa_nankivell_aug2026.pdf	proof of address	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0015	source_of_funds_northbridge.pdf	source of funds declaration	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0016	business_activity_northbridge.pdf	business activity description	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

Field	From	Name	Value	Confidence	How it was handled
FLD-0017	cert_incorporation_northbridge.pdf	company_name	Northbridge Craft Supplies Ltd	0.96	above the floor
FLD-0018	cert_incorporation_northbridge.pdf	registration_number	UK-99010288	0.95	above the floor

FLD-0035	business_activity_northbridge.pdf	declared_industry	Wholesale of craft and hobby goods	0.90	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0002	Denton Halliwell	director	1978-06-02	GB	GB
IND-0003	Priya Nankivell	director	1985-11-19	GB	GB

The threshold is **25%**: at or above it, an owner must be verified.

No beneficial owners are declared on this case.

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

No registry check was run: the case did not reach the paid step.

Identity.

Nothing to show.

Screening. Internal only - none of this may be repeated to the applicant.

Nothing to show.

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

This case never reached Step 7, so it has no score and no band.

G. Decision

`kb/analyst_decision_taxonomy.csv` says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band `insufficient_evidence`:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	not offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	not offered	medium, high, critical	analyst	rejected

No decision has been recorded on this case.

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0002
Template	TPL-0001
Situation	resubmission
Audience	applicant
Type	resubmission_request
Approval	approved, by ops.queue
Sent	sent

Hello Denton Halliwell, thank you for your application for Northbridge Craft Supplies Ltd (reference WAL-ONB-0002). To continue we need the following items: ubo declaration, id document. Please upload them in the onboarding portal. If anything is unclear, reply to this message and our onboarding team will help.

I. Timeline

Every audit event on this case, oldest first - **28 in total**. The actor says who acted: system for the orchestration, ai_agent for a model, external_provider for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0002	Northbridge Craft Supplies Ltd	sme_corporate	resubmission_required	customer	—	—	1	resubmission (customer)	0

The open holds in full:

Hold	Code	Owner	Placed by	Why
HLD-0001	resubmission	customer	step.document_quality	1 document(s) must be resubmitted before the case can proceed

A **hold** is a lock. Only the step that placed it, or the named person it belongs to, can release it, and the case moves only when every hold is clear.

WAL-ONB-0003 - Calderwick Logistics Ltd

Regional road freight and contract haulage · private_limited_company in GB, registered as UK-99014477 · expected usage: Up to 30 fuel cards; around 60000 GBP per month

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1

Value	This application
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self_employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, route primary, by rule AT-06. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
GB	UK	wallester_uk_ltd	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000024	RULE-0051	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000025	RULE-0052	entity proof	registry extract	required	the company	—	—	accepted

optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0017	cert_incorporation_calderwick.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

Field	From	Name	Value	Confidence	How it was handled
FLD-0036	cert_incorporation_calderwick.pdf	company_name	Calderwick Logistics Ltd	0.96	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0004	Marcus Ellersby	director	1974-01-27	GB	GB

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0005	Roisin Delamere	director	1982-05-09	IE	GB
IND-0006	Torvald Kellingray	ubo	1969-08-22	GB	GB

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0001	Torvald Kellingray	direct shareholding	Calderwick Logistics Ltd	60% held directly	60%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub UK	active	review	0.88	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Calderwick Logistics Ltd	Calderwick Logistics Ltd	match
registration number	UK-99014477	UK-99014477	match
registered address	Enterprise House, 14 Bell Lane, Leeds LS11 9PT, United Kingdom	14 Marlow Court, Leeds LS11 9RB, United Kingdom	mismatch
directors	Marcus Ellersby, Roisin Delamere	Marcus Ellersby, Roisin Delamere	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0002	Marcus Ellersby	pass	pass	pass	match	false	false	pass
IDC-0003	Roisin Delamere	pass	pass	pass	match	false	false	pass
IDC-0004	Torvald Kellingray	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0003	the applicant entity	no_match	no_match	none	none	—
SCR-0004	Marcus Ellersby	no_match	no_match	none	none	—
SCR-0005	Roisin Delamere	no_match	no_match	none	none	—
SCR-0006	Torvald Kellingray	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	fired	+30	30	FND-0001
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	fired	+5	35	FLD-0041
RS-12	usage_volume	expected monthly spend above 50k	fired	+8	43	APP-0003
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

$$30 + 5 + 8 = 43$$

What	Value
Score	43
Band the score alone would give	medium (25-49)
Hard floors that applied	none
Final band	medium
Recommended action	conditional_approve
Human sign-off required	yes

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band medium:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	offered	low, medium	analyst	approved
conditional_approve	2	offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	offered	medium, high, critical	analyst	rejected

Field	Value
Decision	request_more_information
Recorded by	R. Toome (analyst)
Reason code	registered_address_mismatch
Rationale	Registry and applicant documents disagree on the registered address. Everything else corroborates. Asking the applicant to confirm the current registered address and provide a document that shows it, rather than escalating, because no screening or identity issue is present.
Evidence relied on	RSK-0002, REG-0002, EVP-0002
Escalation target	—
Override?	yes
Override direction	stricter
Override reason	Registry and applicant documents disagree on the registered address. Everything else corroborates. Asking the applicant to confirm the current registered address and provide a document that shows it, rather than escalating, because no screening or identity issue is present.

An **override** means the decision differed from the recommendation. The system recommended conditional_approve (severity rank 2) and the reviewer chose request_more_information (rank 4), so the direction is **stricter**. The reviewer does not declare this; the system computes it from the severity order.

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0003
Template	TPL-0002
Situation	clarification
Audience	applicant
Type	clarification_request
Approval	approved, by R. Toome
Sent	sent

Hello Marcus Ellersby, we are completing the company checks for Calderwick Logistics Ltd (reference WAL-ONB-0003). The registered address held on the official company register does not appear to be the same as the address on the documents you submitted. Please confirm the current registered address and upload a document that shows it.

I. Timeline

Every audit event on this case, oldest first - **63 in total**. The actor says who acted: system for the orchestration, ai_agent for a model, external_provider for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0003	Calderwick Logistics Ltd	sme_corporate	analyst_review_required	system	medium	43	0	—	0

WAL-ONB-0004 - Vestmark Nordic OU

Import and distribution of marine equipment · private_limited_company in EE, registered as EE-90012345 · expected usage: Up to 15 cards; around 35000 EUR per month

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	3
has_corporate_shareholder	True
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	MATCHED - this rule decided the case

Rule	Order	Condition in plain words	Would give	What happened
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	not checked - an earlier rule already matched

Result: complex_corporate_ubo, **route** primary, **by rule AT-03**. Indirect ownership chain needs enhanced UBO handling (Sections 5.1 and 14.4)

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
EE	EE	wallester_as	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000042	RULE-0021	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000043	RULE-0022	entity proof	registry extract	required	the company	—	—	accepted

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	16	16	0	0	—
conditional	6	0	3	3	liveness selfie, source of wealth statement
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0032	cert_incorporation_vestmark.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—

FLD-0087	business_activity_vestmark.pdf	declared_industry	Wholesale of marine equipment	0.90	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0007	Lembit Vaher	director	1971-02-11	EE	EE

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0008	Anneli Sormus	director	1980-07-30	EE	EE
IND-0009	Ruben Halvorsen	ubo	1966-12-05	NO	NO

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0002	Anneli Sormus	direct shareholding	Vestmark Nordic OU	24.5% held directly	24.5%	verified
UBO-0003	Ruben Halvorsen	indirect shareholding	Harboe Holdings OU > Lindval Mid Holdings SA > Vestmark Nordic OU	70% x 45% = 31.5%	31.5%	unverified - at or above the threshold and not verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub EE	active	review	0.52	1	false

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Vestmark Nordic OU	Vestmark Nordic OU	match
registration number	EE-90012345	EE-90012345	match
registered address	Sadama 14, 10111 Tallinn, Estonia	Sadama 14, 10111 Tallinn, Estonia	match
directors	Lembit Vaher, Anneli Sormus	Lembit Vaher, Anneli Sormus	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0005	Lembit Vaher	pass	pass	pass	match	false	false	pass
IDC-0006	Anneli Sormus	pass	pass	pass	match	false	false	pass
IDC-0007	Ruben Halvorsen	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0007	the applicant entity	no_match	no_match	none	none	—
SCR-0008	Lembit Vaher	no_match	no_match	none	none	—
SCR-0009	Anneli Sormus	no_match	no_match	none	none	—
SCR-0010	Ruben Halvorsen	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence	
RS-01	jurisdiction_risk	ubo resident outside applicant country	fired	+8	8	UBO-0003	
RS-02	industry_risk	high risk industry	not fired	0		—	
RS-03	ownership_complexity	ownership layers gt 1	fired	+15	23	UBO-0003	
RS-04	ownership_opacity	ubo not supported by registry	fired	+25	48	FND-0003	
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—	
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—	
RS-07	entity_status	entity not active	not fired	0		—	
RS-08	identity_verification	identity check failed	not fired	0		—	
RS-09	identity_verification	identity duplicate	not fired	0		—	
RS-10	extraction_confidence	low confidence accepted as read	fired	+6	54	FLD-0075\	FLD-0077
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—	
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—	
RS-13	pep_exposure	pep match	not fired	0		—	
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—	
RS-15	adverse_media_severity	adverse media serious	not fired	0		—	
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—	
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—	
RS-18	document_quality	document resubmission required	not fired	0		—	
RS-19	document_quality	document manual review	fired	+15	69	DOC-0038	

The arithmetic.

$$8 + 15 + 25 + 6 + 15 = 69$$

What	Value
Score	69
Band the score alone would give	high (50-79)
Hard floors that applied	none
Final band	high
Recommended action	enhanced_due_diligence
Human sign-off required	yes

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band high:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved

insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	offered	high, critical	compliance	analyst_review_required
reject	8	offered	medium, high, critical	analyst	rejected

Field	Value
Decision	enhanced_due_diligence
Recorded by	M. Sild (analyst)
Reason code	ownership_structure_unclear
Rationale	Declared indirect ownership is not supported by the registry and the supporting chart is incomplete. Routing to enhanced due diligence and asking the applicant for a complete chart and a source-of-wealth statement. No adverse screening finding is present, so this is an evidence-quality escalation, not a financial-crime referral.
Evidence relied on	RSK-0003, REG-0003, EVP-0003
Escalation target	—
Override?	no
Override direction	—
Override reason	—

H. Communications

Everything an applicant receives comes from `kb/message_template.csv`. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0004
Template	TPL-0004
Situation	manual_review_underway
Audience	applicant
Type	manual_review_underway
Approval	approved, by M. Sild
Sent	sent

Hello Lembit Vaher, your application for Vestmark Nordic OU (reference WAL-ONB-0004) is with our onboarding team for an additional manual review step. No further documents are needed from you at this time. We will contact you as soon as this step is complete.

I. Timeline

Every audit event on this case, oldest first - **73 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0004	Vestmark Nordic OU	complex_corporate_ubo	enhanced_due_diligence	system	high	69	0	—	0

WAL-ONB-0005 - Quillon Marine Services Ltd

Offshore vessel chartering and crew logistics · private_limited_company in GB, registered as UK-99017733 · expected usage: Up to 40 cards; around 120000 GBP per month on fuel, port fees and crew travel

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, route primary, by rule AT-06. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
GB	UK	wallester_uk_ltd	true	—

B. Checklist

Step 2 builds this from `kb/requirement_rule.csv`, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000064	RULE-0051	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000065	RULE-0052	entity proof	registry extract	required	the company	—	—	accepted

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	13	13	0	0	—
conditional	5	2	1	2	liveness selfie
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0048	cert_incorporation_quillon.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—

FLD-0108	business_activity_quillon.pdf	declared_industry	Offshore marine chartering	0.90	above the floor
FLD-0109	bank_statement_quillon_aug2026.pdf	account_holder	Quillon Marine Services Ltd	0.89	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0010	Gareth Pennyfold	director	1975-09-17	GB	GB
IND-0011	Ines Carrasco-Bell	director	1983-04-03	ES	GB
IND-0012	Aurelio Vantano	ubo	1962-11-28	IT	MT

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0004	Aurelio Vantano	direct shareholding	Quillon Marine Services Ltd	55% held directly	55%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub UK	active	pass	0.93	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Quillon Marine Services Ltd	Quillon Marine Services Ltd	match
registration number	UK-99017733	UK-99017733	match
registered address	Harbour House, 2 Dockside Walk, Aberdeen AB11 5QT, United Kingdom	Harbour House, 2 Dockside Walk, Aberdeen AB11 5QT, United Kingdom	match
directors	Gareth Pennyfold, Ines Carrasco-Bell	Gareth Pennyfold, Ines Carrasco-Bell	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0008	Gareth Pennyfold	pass	pass	pass	match	false	false	pass
IDC-0009	Ines Carrasco-Bell	pass	pass	pass	match	false	false	pass
IDC-0010	Aurelio Vantano	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references	
SCR-0011	the applicant entity	no_match	no_match	none	none	—	
SCR-0012	Gareth Pennyfold	no_match	no_match	none	none	—	
SCR-0013	Ines Carrasco-Bell	no_match	no_match	none	none	—	
SCR-0014	Aurelio Vantano	no_match	pep_match	moderate	high	SCREEN-REF-PEP-4471\	SCREEN-REF-MEDIA-9920

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	fired	+8	8	UBO-0004
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	fired	+8	16	APP-0005
RS-13	pep_exposure	pep match	fired	+30	46	SCR-0014
RS-14	adverse_media_severity	adverse media moderate	fired	+20	66	SCR-0014
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

8 + 8 + 30 + 20 = 66

What	Value
Score	66
Band the score alone would give	high (50-79)
Hard floors that applied	pep_match forces at least high
Final band	high
Recommended action	enhanced_due_diligence
Human sign-off required	yes

A **hard floor** is a rule that overrides the arithmetic. Where a floor applies, the band is guaranteed whatever the points say - which is why the score and the band can disagree.

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band high:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	offered	high, critical	compliance	analyst_review_required
reject	8	offered	medium, high, critical	analyst	rejected

Field	Value
Decision	enhanced_due_diligence
Recorded by	H. Laur (compliance)
Reason code	pep_match_edd_required
Rationale	PEP match on the majority beneficial owner with moderate adverse media on the same individual. Opening enhanced due diligence to establish the position held, the source of wealth and the relevance of the media reporting. Not a rejection: PEP status alone does not disqualify under Wallester policy.
Evidence relied on	RSK-0004, REG-0004, EVP-0004
Escalation target	—
Override?	no
Override direction	—
Override reason	—

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

This case carries a **restricted finding**, so only the generic templates - the ones that state no reason - were available to it.

Field	Value
Message	COM-0005
Template	TPL-0004
Situation	manual_review_underway
Audience	applicant
Type	manual_review_underway

Field	Value
Approval	approved, by H. Laur
Sent	sent

Hello Gareth Pennyfold, your application for Quillon Marine Services Ltd (reference WAL-ONB-0005) is with our onboarding team for an additional manual review step. No further documents are needed from you at this time. We will contact you as soon as this step is complete.

I. Timeline

Every audit event on this case, oldest first - **58 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0005	Quillon Marine Services Ltd	sme_corporate	enhanced_due_diligence	system	high	66	0	—	0

This case is marked **restricted**: customer messages are limited to generic templates.

WAL-ONB-0006 - Saarvik Metall OU

Metal fabrication and industrial subcontracting · private_limited_company in EE, registered as EE-90014782 · expected usage: Up to 20 cards; around 45000 EUR per month on materials and fuel

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, route primary, by rule AT-06. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
EE	EE	wallester_as	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000082	RULE-0008	entity proof	certificate of incorporation	required	the company	—	—	accepted

CHK-000099	RULE-0020	risk specific	bank statement	conditional	the company	expected monthly card spend above 50000 EUR	False	waived

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	14	14	0	0	—
conditional	4	0	2	2	liveness selfie
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0063	cert_incorporation_saarvik.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—

FLD-0119	signatory_list_saarvik.pdf	signatory_name	Rasmus Kalda	0.91	above the floor
FLD-0120	ubo_declaration_saarvik.pdf	ubo_name	Oskar Magiste	0.93	above the floor
FLD-0121	ubo_declaration_saarvik.pdf	ownership_percentage	80.0	0.92	above the floor
FLD-0122	id_card_kalda_r.jpg	full_name	Rasmus Kalda	0.95	above the floor
FLD-0123	id_card_kalda_r.jpg	date_of_birth	1977-05-21	0.94	above the floor
FLD-0124	id_card_lepik_t.jpg	full_name	Triin Lepik	0.94	above the floor
FLD-0125	id_card_magiste_o.jpg	full_name	Oskar Magiste	0.93	above the floor
FLD-0126	poa_kalda_sep2026.pdf	document_date	2026-09-02	0.92	above the floor

Field	From	Name	Value	Confidence	How it was handled
FLD-0127	poa_lepik_aug2026.pdf	document_date	2026-08-21	0.91	above the floor
FLD-0128	poa_magiste_aug2026.pdf	document_date	2026-08-18	0.90	above the floor
FLD-0129	source_of_funds_saarvik.pdf	declared_source	Subcontracting revenue from industrial clients	0.88	above the floor
FLD-0130	business_activity_saarvik.pdf	declared_industry	Metal fabrication	0.91	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0013	Rasmus Kalda	director	1977-05-21	EE	EE
IND-0014	Triin Lepik	director	1986-10-08	EE	EE
IND-0015	Oskar Magiste	ubo	1970-03-16	EE	EE

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0005	Oskar Magiste	direct shareholding	Saarvik Metall OU	80% held directly	80%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub EE	active	pass	0.94	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Saarvik Metall OU	Saarvik Metall OU	match
registration number	EE-90014782	EE-90014782	match
registered address	Tehnika 27, 76505 Saue, Estonia	Tehnika 27, 76505 Saue, Estonia	match
directors	Rasmus Kalda, Triin Lepik	Rasmus Kalda, Triin Lepik	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0011	Rasmus Kalda	pass	pass	pass	match	false	false	pass
IDC-0012	Triin Lepik	pass	pass	pass	match	false	false	pass
IDC-0013	Oskar Magiste	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0015	the applicant entity	no_match	no_match	none	none	—
SCR-0016	Rasmus Kalda	possible_match	no_match	none	critical	SCREEN-REF-SAN-2281
SCR-0017	Triin Lepik	no_match	no_match	none	none	—
SCR-0018	Oskar Magiste	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	fired	+60	60	SCR-0016
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

$$60 = 60$$

What	Value
Score	60
Band the score alone would give	high (50-79)
Hard floors that applied	sanctions_possible_match forces at least critical
Final band	critical
Recommended action	escalate
Human sign-off required	yes

A **hard floor** is a rule that overrides the arithmetic. Where a floor applies, the band is guaranteed whatever the points say - which is why the score and the band can disagree.

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band critical:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	not offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	offered	high, critical	compliance	analyst_review_required
reject	8	offered	medium, high, critical	analyst	rejected

Field	Value
Decision	escalate
Recorded by	K. Ohtla (compliance)
Reason code	possible_sanctions_match
Rationale	Possible sanctions match on a registered director with sole signing authority. Escalating to the MLRO queue for adjudication. No automated clearance and no customer disclosure of the reason for review.
Evidence relied on	RSK-0005, REG-0005, EVP-0005
Escalation target	MLRO queue - Wallester AS
Override?	no
Override direction	—

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

This case carries a **restricted finding**, so only the generic templates - the ones that state no reason - were available to it.

Field	Value
Message	COM-0006
Template	TPL-0004
Situation	manual_review_underway
Audience	applicant
Type	manual_review_underway
Approval	approved, by K. Ohtla
Sent	sent

Hello Rasmus Kalda, your application for Saarkiv Metall OU (reference WAL-ONB-0006) is with our onboarding team for an additional manual review step. No further documents are needed from you at this time. We will contact you as soon as this step is complete.

I. Timeline

Every audit event on this case, oldest first - **57 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0006	Saarvik Metall OU	sme_corporate	analyst_review_required	compliance	critical	60	1	manual_review (analyst)	0

The open holds in full:

Hold	Code	Owner	Placed by	Why
HLD-0005	manual_review	analyst	step.screening	a possible sanctions match needs an analyst; no automated step may clear it

A **hold** is a lock. Only the step that placed it, or the named person it belongs to, can release it, and the case moves only when every hold is clear.

This case is marked **restricted**: customer messages are limited to generic templates.

WAL-ONB-0007 - Bramforth Aggregates Ltd

Supply of construction aggregates and tipper haulage · private_limited_company in GB, registered as UK -99021560 · expected usage: Up to 25 cards; around 55000 GBP per month on fuel and plant hire

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, route primary, by rule AT-06. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
GB	UK	wallester_uk_ltd	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000100	RULE-0051	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000101	RULE-0052	entity proof	registry extract	required	the company	—	—	accepted
CHK-000102	RULE-0053	entity proof	tax registration certificate	conditional	the company	company is VAT registered	True	accepted
CHK-000103	RULE-0054	directors officers	director register	required	the company	—	—	accepted
CHK-000104	RULE-0055	directors officers	authorised signatory list	required	the company	—	—	accepted
CHK-000105	RULE-0056	directors officers	board resolution	conditional	the company	authorised signatory is not a registered director	False	waived
CHK-000106	RULE-0057	ownership ubo	ubo declaration	required	the company	—	—	accepted
CHK-000107	RULE-0058	individual identity	id document	required	Nigel Braithwaite-Cole	—	—	accepted
CHK-000108	RULE-0058	individual identity	id document	required	Fenella Quist	—	—	accepted
CHK-000109	RULE-0059	individual identity	proof of address	required	Nigel Braithwaite-Cole	—	—	accepted
CHK-000110	RULE-0059	individual identity	proof of address	required	Fenella Quist	—	—	accepted
CHK-000111	RULE-0060	individual identity	liveness selfie	conditional	Nigel Braithwaite-Cole	remote onboarding without in-person verification	not answered	pending
CHK-000112	RULE-0061	source of funds	source of funds declaration	required	the company	—	—	accepted
CHK-000113	RULE-0062	business model	business activity description	required	the company	—	—	accepted
CHK-000114	RULE-0063	risk specific	bank statement	conditional	the company	expected monthly card spend above 50000 EUR	True	accepted

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	11	11	0	0	—
conditional	4	2	1	1	liveness selfie
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against kb/document_quality_rules.csv. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

Field	From	Name	Value	Confidence	How it was handled
FLD-0131	cert_incorporation_bramforth.pdf	company_name	Bramforth Aggregates Ltd	0.95	above the floor
FLD-0132	cert_incorporation_bramforth.pdf	registration_number	UK-99021560	0.94	above the floor

FLD-0149	business_activity_bramforth.pdf	declared_industry	Construction aggregates and haulage	0.90	above the floor
FLD-0150	bank_statement_bramforth_aug2026.pdf	account_holder	Bramforth Aggregates Ltd	0.88	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0016	Nigel Braithwaite-Cole	director	1968-04-12	GB	GB
IND-0017	Fenella Quist	ubo	1979-01-25	GB	GB

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0006	Fenella Quist	direct shareholding	Bramforth Aggregates Ltd	45% held directly	45%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub UK	active	pass	0.90	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Bramforth Aggregates Ltd	Bramforth Aggregates Ltd	match
registration number	UK-99021560	UK-99021560	match
registered address	Bramforth Yard, Pinfold Lane, Doncaster DN4 6RS, United Kingdom	Bramforth Yard, Pinfold Lane, Doncaster DN4 6RS, United Kingdom	match
directors	Nigel Braithwaite-Cole	Nigel Braithwaite-Cole	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0014	Nigel Braithwaite-Cole	pass	pass	pass	match	false	false	pass
IDC-0015	Fenella Quist	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references	
SCR-0019	the applicant entity	no_match	no_match	none	none	—	

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references	
SCR-0020	Nigel Braithwaite-Cole	no_match	no_match	serious	high	SCREEN-REF-MEDIA-5514\	SCREEN-REF-MEDIA-5517
SCR-0021	Fenella Quist	no_match	no_match	none	none	—	

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	fired	+6	6	FLD-0138
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	fired	+8	14	APP-0007
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	fired	+40	54	SCR-0020
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

$$6 + 8 + 40 = 54$$

What	Value
Score	54
Band the score alone would give	high (50-79)
Hard floors that applied	adverse_media_serious forces at least high
Final band	high
Recommended action	enhanced_due_diligence
Human sign-off required	yes

A **hard floor** is a rule that overrides the arithmetic. Where a floor applies, the band is guaranteed whatever the points say - which is why the score and the band can disagree.

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band high:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	offered	high, critical	compliance	analyst_review_required
reject	8	offered	medium, high, critical	analyst	rejected

Field	Value
Decision	escalate
Recorded by	D. Ferreira (compliance)
Reason code	serious_adverse_media
Rationale	Serious adverse media on the sole director and sole signatory, in the applicant's own sector, with no separation of control. Referring to the financial crime review team rather than handling in standard enhanced due diligence.
Evidence relied on	RSK-0006, REG-0006, EVP-0006
Escalation target	Financial crime review team - Wallester UK Ltd
Override?	yes
Override direction	stricter
Override reason	Serious adverse media on the sole director and sole signatory, in the applicant's own sector, with no separation of control. Referring to the financial crime review team rather than handling in standard enhanced due diligence.

An **override** means the decision differed from the recommendation. The system recommended enhanced_due_diligence (severity rank 6) and the reviewer chose escalate (rank 7), so the direction is **stricter**. The reviewer does not declare this; the system computes it from the severity order.

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

This case carries a **restricted finding**, so only the generic templates - the ones that state no reason - were available to it.

Field	Value
Message	COM-0007
Template	TPL-0004
Situation	manual_review_underway
Audience	applicant
Type	manual_review_underway
Approval	approved, by D. Ferreira

Field	Value
Sent	sent

Hello Nigel Braithwaite-Cole, your application for Bramforth Aggregates Ltd (reference WAL-ONB-0007) is with our onboarding team for an additional manual review step. No further documents are needed from you at this time. We will contact you as soon as this step is complete.

I. Timeline

Every audit event on this case, oldest first - **57 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0007	Bramforth Aggregates Ltd	sme_corporate	analyst_review_required	compliance	high	54	1	sanctions_escalation (compliance)	0

The open holds in full:

Hold	Code	Owner	Placed by	Why
HLD-0007	sanctions_escalation	compliance	step.screening	a screening finding needs a compliance decision before the case moves

A **hold** is a lock. Only the step that placed it, or the named person it belongs to, can release it, and the case moves only when every hold is clear.

This case is marked **restricted**: customer messages are limited to generic templates.

WAL-ONB-0008 - Kestrel Pay Partners OU

Payments software platform seeking a white-label card programme · private_limited_company in EE, registered as EE-90016004 · expected usage: Programme level; not assessed in this phase

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	white_label
ownership_layers	0
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	MATCHED - this rule decided the case
AT-02	2	entity type is one of sole_trader, freelancer, self_employed	freelancer_sole_trader	not checked - an earlier rule already matched
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	not checked - an earlier rule already matched

Rule	Order	Condition in plain words	Would give	What happened
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	not checked - an earlier rule already matched

Result: white_label_partner, **route** white_label_branch, **by rule AT-01**. White-label programme partners are identified but not decisioned in the first POC (Sections 3 and 6.2)

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
EE	EE	undetermined	true	—

The scope is undetermined on purpose: which Wallester entity contracts with a white-label partner is settled in the programme phase, not here.

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000115	RULE-0038	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000116	RULE-0039	entity proof	registry extract	required	the company	—	—	accepted
CHK-000117	RULE-0040	directors officers	director register	required	the company	—	—	accepted
CHK-000118	RULE-0041	ownership ubo	ubo declaration	required	the company	—	—	accepted
CHK-000119	RULE-0042	business model	programme business plan	required	the company	—	—	accepted
CHK-000120	RULE-0043	risk specific	website or platform details	required	the company	—	—	accepted

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	6	6	0	0	—
conditional	0	0	0	0	—
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against kb/document_quality_rules.csv. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0090	cert_incorporation_kestrel.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0091	registry_extract_kestrel.pdf	registry extract	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0092	director_register_kestrel.pdf	director register	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0093	ubo_declaration_kestrel.pdf	ubo declaration	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0094	programme_business_plan_kestrel.pdf	programme business plan	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0095	platform_details_kestrel.pdf	website or platform details	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

No fields were extracted on this case.

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0018	Marek Tonisson	director	1981-08-04	EE	EE

The threshold is **25%**: at or above it, an owner must be verified.

No beneficial owners are declared on this case.

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

No registry check was run: the case did not reach the paid step.

Identity.

Nothing to show.

Screening. Internal only - none of this may be repeated to the applicant.

Nothing to show.

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

This case never reached Step 7, so it has no score and no band.

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band insufficient_evidence:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	not offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	not offered	medium, high, critical	analyst	rejected

No decision has been recorded on this case.

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0008
Template	TPL-0010
Situation	white_label_intake
Audience	applicant
Type	white_label_intake_acknowledgement
Approval	approved, by ops.queue
Sent	sent

Hello Marek Tonisson, thank you for the partner programme enquiry for Kestrel Pay Partners OU (reference WAL-ONB-0008). Your company documents have been received. Partner programme onboarding is handled by our programme delivery team, who will contact you about the next steps.

I. Timeline

Every audit event on this case, oldest first - **14 in total**. The actor says who acted: system for the orchestration, ai_agent for a model, external_provider for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

Coffee roasting and wholesale supply to cafes · private_limited_company in EE, registered as EE-90018321 · expected usage: Up to 8 cards; around 9000 EUR per month on green coffee and packaging

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, route primary, by rule AT-06. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0019	Katrin Ilves	director	1984-02-19	EE	EE
IND-0020	Mihkel Roosaar	ubo	1976-06-11	EE	EE

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0007	Mihkel Roosaar	direct shareholding	Parnu Kohviubade OU	70% held directly	70%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub EE	active	pass	0.97	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Parnu Kohviubade OU	Parnu Kohviubade OU	match
registration number	EE-90018321	EE-90018321	match
registered address	Ringi 42, 80010 Parnu, Estonia	Ringi 42, 80010 Parnu, Estonia	match
directors	Katrin Ilves	Katrin Ilves	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0016	Katrin Ilves	pass	pass	pass	match	false	false	pass
IDC-0017	Mihkel Roosaar	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0022	the applicant entity	no_match	no_match	none	none	—
SCR-0023	Katrin Ilves	no_match	no_match	none	none	—
SCR-0024	Mihkel Roosaar	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	not fired	0		—

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

no factors fired = 0

What	Value
Score	0
Band the score alone would give	low (0-24)
Hard floors that applied	none
Final band	low
Recommended action	approve
Human sign-off required	no

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band low:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	offered	low, medium	analyst	approved
conditional_approve	2	offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	not offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	not offered	medium, high, critical	analyst	rejected

Field	Value
Decision	approve
Recorded by	R. Toome (analyst)
Reason code	all_mandatory_checks_passed
Rationale	Complete document set at first submission, registry corroboration on every compared field, identity checks passed and no screening findings. Approving under the low-risk path.
Evidence relied on	RSK-0007, REG-0007, EVP-0007
Escalation target	—
Override?	no
Override direction	—
Override reason	—

H. Communications

Everything an applicant receives comes from `kb/message_template.csv`. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0009
Template	TPL-0007
Situation	final_outcome_approved
Audience	applicant
Type	approval_notification
Approval	approved, by R. Toome
Sent	sent

Hello Katrin Ilves, good news. The Wallester Business account for Parnu Kohviubade OU (reference WAL-ONB-0009) has been approved. You can sign in to the portal to order your first cards and invite users.

I. Timeline

Every audit event on this case, oldest first - **49 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0009	Parnu Kohviubade OU	sme_corporate	approved	system	low	0	0	—	0

WAL-ONB-0010 - Thornbury Analytics Ltd

Data analytics consultancy for the retail sector · private_limited_company in GB, registered as UK-99025819 · expected usage: Up to 18 cards; around 22000 GBP per month on software and travel

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	2
has_corporate_shareholder	True
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self_employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	MATCHED - this rule decided the case
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	not checked - an earlier rule already matched

Result: complex_corporate_ubo, **route** primary, **by rule AT-03**. Indirect ownership chain needs enhanced UBO handling (Sections 5.1 and 14.4)

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
GB	UK	wallester_uk_ltd	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000136	RULE-0064	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000137	RULE-0065	entity proof	registry extract	required	the company	—	—	accepted

optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0108	cert_incorporation_thornbury.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

Field	From	Name	Value	Confidence	How it was handled
FLD-0168	cert_incorporation_thornbury.pdf	company_name	Thornbury Analytics Ltd	0.96	above the floor
FLD-0169	cert_incorporation_thornbury.pdf	registration_number	UK-99025819	0.95	above the floor

FLD-0192	source_of_wealth_marchbank.pdf	declared_source_of_wealth	Proceeds of the founder's earlier consultancy sale, held through Marchbank Holdings Ltd	0.91	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0021	Imogen Skellow	director	1987-12-01	GB	GB
IND-0022	Callum Pryde-Nash	director	1979-07-23	GB	GB
IND-0023	Helena Marchbank	ubo	1973-10-14	GB	GB

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0008	Helena Marchbank	indirect shareholding	Marchbank Holdings Ltd > Thornbury Analytics Ltd	100% x 70% = 70%	70%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub UK	active	pass	0.95	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Thornbury Analytics Ltd	Thornbury Analytics Ltd	match
registration number	UK-99025819	UK-99025819	match
registered address	5 Wraysbury Mews, Bristol BS1 6TT, United Kingdom	5 Wraysbury Mews, Bristol BS1 6TT, United Kingdom	match
directors	Imogen Skellow, Callum Pryde-Nash	Imogen Skellow, Callum Pryde-Nash	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0018	Imogen Skellow	pass	pass	pass	match	false	false	pass
IDC-0019	Callum Pryde-Nash	pass	pass	pass	match	false	false	pass
IDC-0020	Helena Marchbank	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0025	the applicant entity	no_match	no_match	none	none	—
SCR-0026	Imogen Skellow	no_match	no_match	none	none	—
SCR-0027	Callum Pryde-Nash	no_match	no_match	none	none	—
SCR-0028	Helena Marchbank	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	fired	+15	15	UBO-0008
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

$$15 = 15$$

What	Value
Score	15

What	Value
Band the score alone would give	low (0-24)
Hard floors that applied	none
Final band	low
Recommended action	approve
Human sign-off required	no

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band low:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	offered	low, medium	analyst	approved
conditional_approve	2	offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	not offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	not offered	medium, high, critical	analyst	rejected

No decision has been recorded on this case.

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0010
Template	TPL-0005
Situation	status_update
Audience	applicant
Type	status_update
Approval	approved, by ops.queue
Sent	sent

Hello Imogen Skellow, we have received your application for Thornbury Analytics Ltd and all of the documents we asked for. Your case reference is WAL-ONB-0010. Your application is now with our onboarding team and we will let you know as soon as the review is complete.

I. Timeline

Every audit event on this case, oldest first - **58 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0010	Thornbury Analytics Ltd	complex_corporate_ubo	ready_for_decision	analyst	low	15	0	—	0

WAL-ONB-0011 - Ardenhall Joinery Ltd

Bespoke joinery and shopfitting for retail interiors · private_limited_company in GB, registered as UK-99031147 · expected usage: Up to 10 cards; around 18000 GBP per month on timber and fixings

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, route primary, by rule AT-06. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
GB	UK	wallester_uk_ltd	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000158	RULE-0051	entity proof	certificate of incorporation	required	the company	—	—	accepted

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status

CHK-000175	RULE-0063	risk specific	bank statement	conditional	the company	expected monthly card spend above 50000 EUR	False	waived

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	13	13	0	0	—
conditional	5	1	2	2	liveness selfie
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0124	cert_incorporation_ardenhall.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0125	registry_extract_ardenhall.pdf	registry extract	accepted_for_checks	accepted_for_checks	—	none fired	—	—

FLD-0212	business_activity_ardenhall.pdf	declared_industry	Joinery and shopfitting	0.91	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0024	Rowan Feathersby	director	1972-03-08	GB	GB
IND-0025	Delia Ormsby-Crane	director	1980-11-26	GB	GB
IND-0026	Wilhelmina Tarrant	ubo	1965-07-14	GB	GB

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0009	Wilhelmina Tarrant	direct shareholding	Ardenhall Joinery Ltd	65% held directly	65%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub UK	dissolved	fail	0.97	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Ardenhall Joinery Ltd	Ardenhall Joinery Ltd	match
registration number	UK-99031147	UK-99031147	match
registered address	Ardenhall Works, 6 Kiln Row, Derby DE1 3QF, United Kingdom	Ardenhall Works, 6 Kiln Row, Derby DE1 3QF, United Kingdom	match
directors	Rowan Feathersby, Delia Ormsby-Crane	Rowan Feathersby, Delia Ormsby-Crane	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0021	Rowan Feathersby	pass	pass	pass	match	false	false	pass
IDC-0022	Delia Ormsby-Crane	pass	pass	pass	match	false	false	pass
IDC-0023	Wilhelmina Tarrant	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0029	the applicant entity	no_match	no_match	none	none	—
SCR-0030	Rowan Feathersby	no_match	no_match	none	none	—
SCR-0031	Delia Ormsby-Crane	no_match	no_match	none	none	—
SCR-0032	Wilhelmina Tarrant	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	fired	+60	60	FND-0008
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

$60 = 60$

What	Value
Score	60
Band the score alone would give	high (50-79)
Hard floors that applied	entity_not_active forces at least high
Final band	high
Recommended action	reject
Human sign-off required	yes

A **hard floor** is a rule that overrides the arithmetic. Where a floor applies, the band is guaranteed whatever the points say - which is why the score and the band can disagree.

G. Decision

`kb/analyst_decision_taxonomy.csv` says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band high:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	offered	high, critical	compliance	analyst_review_required
reject	8	offered	medium, high, critical	analyst	rejected

Field	Value
Decision	reject
Recorded by	J. Okoro (analyst)
Reason code	entity_not_active_on_register
Rationale	The register records the applicant as dissolved. This is an eligibility failure and not a judgement about the people involved: identity and screening were clean throughout. Rejecting with the door left open to a new application if the company is restored.
Evidence relied on	RSK-0009, REG-0009, EVP-0009
Escalation target	—
Override?	no
Override direction	—
Override reason	—

H. Communications

Everything an applicant receives comes from `kb/message_template.csv`. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0011
Template	TPL-0011
Situation	final_outcome_declined
Audience	applicant
Type	application_declined
Approval	approved, by J. Okoro
Sent	sent

Hello Rowan Feathersby, thank you for your application for Ardenhall Joinery Ltd (reference WAL-ONB-0011). We are not able to open an account at this time. If your circumstances change you are welcome to apply again.

I. Timeline

Every audit event on this case, oldest first - **57 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0011	Ardenhall Joinery Ltd	sme_corporate	rejected	system	high	60	1	eligibility (analyst)	0

The open holds in full:

Hold	Code	Owner	Placed by	Why
HLD-0008	eligibility	analyst	step.verification	1 verification outcome(s) need an analyst: RG-01: Company status on the register is 'dissolved': A dissolved company cannot be onboarded; an analyst confirms before anything is said to the customer

A **hold** is a lock. Only the step that placed it, or the named person it belongs to, can release it, and the case moves only when every hold is clear.

WAL-ONB-0012 - Solvarn Baltic OU

Industrial valve distribution and maintenance · private_limited_company in EE, registered as EE-90021455 · expected usage: Up to 16 cards; around 30000 EUR per month on parts and travel

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self_employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, **route** primary, **by rule AT-06**. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
EE	EE	wallester_as	true	—

B. Checklist

Step 2 builds this from `kb/requirement_rule.csv`, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000176	RULE-0008	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000177	RULE-0009	entity proof	registry extract	required	the company	—	—	accepted

CHK-000181	RULE-0013	directors officers	board resolution	conditional	the company	authorised signatory is not a registered director	False	waived
CHK-000182	RULE-0014	ownership ubo	ubo declaration	required	the company	—	—	accepted
CHK-000183	RULE-0015	individual identity	id document	required	Taavi Ruumet	—	—	accepted
CHK-000184	RULE-0015	individual identity	id document	required	Ivar Kolmsaar	—	—	accepted
CHK-000185	RULE-0016	individual identity	proof of address	required	Taavi Ruumet	—	—	accepted
CHK-000186	RULE-0016	individual identity	proof of address	required	Ivar Kolmsaar	—	—	accepted
CHK-000187	RULE-0017	individual identity	liveness selfie	conditional	Taavi Ruumet	remote onboarding without in-person verification	not answered	pending
CHK-000188	RULE-0018	source of funds	source of funds declaration	required	the company	—	—	accepted
CHK-000189	RULE-0019	business model	business activity description	required	the company	—	—	accepted
CHK-000190	RULE-0020	risk specific	bank statement	conditional	the company	expected monthly card spend above 50000 EUR	False	waived

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	12	12	0	0	—
conditional	3	0	2	1	liveness selfie
optional	0	0	0	0	—

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0138	cert_incorporation_solvarn.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0139	registry_extract_solvarn.pdf	registry extract	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

Field	From	Name	Value	Confidence	How it was handled
FLD-0213	cert_incorporation_solvarn.pdf	company_name	Solvarn Baltic OU	0.96	above the floor
FLD-0214	cert_incorporation_solvarn.pdf	registration_number	EE-90021455	0.95	above the floor

FLD-0229	business_activity_solvarn.pdf	declared_industry	Industrial equipment distribution	0.91	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0027	Taavi Ruumet	director	1979-05-30	EE	EE
IND-0028	Ivar Kolmsaar	ubo	1968-02-17	EE	EE

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0010	Ivar Kolmsaar	direct shareholding	Solvarn Baltic OU	80% held directly	80%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub EE	active	pass	0.94	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Solvarn Baltic OU	Solvarn Baltic OU	match
registration number	EE-90021455	EE-90021455	match
registered address	Punane 18, 13619 Tallinn, Estonia	Punane 18, 13619 Tallinn, Estonia	match
directors	Taavi Ruumet	Taavi Ruumet	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0024	Taavi Ruumet	pass	pass	pass	match	false	false	pass
IDC-0025	Ivar Kolmsaar	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0033	the applicant entity	no_match	no_match	none	none	—
SCR-0034	Taavi Ruumet	no_match	no_match	none	none	—
SCR-0035	Ivar Kolmsaar	clear_match	no_match	none	critical	SCREEN-REF-SAN-7714

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	not fired	0		—
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	fired	+70	70	SCR-0035
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

$$70 = 70$$

What	Value
Score	70
Band the score alone would give	high (50-79)
Hard floors that applied	sanctions_clear_match forces at least critical
Final band	critical
Recommended action	escalate
Human sign-off required	yes

A **hard floor** is a rule that overrides the arithmetic. Where a floor applies, the band is guaranteed whatever the points say - which is why the score and the band can disagree.

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band critical:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	not offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
insufficient_evidence	5	not offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	offered	high, critical	compliance	analyst_review_required
reject	8	offered	medium, high, critical	analyst	rejected

Field	Value
Decision	escalate
Recorded by	K. Ohtla (compliance)
Reason code	confirmed_sanctions_match_on_ubo
Rationale	Confirmed sanctions match on the majority beneficial owner. This is outside the analyst mandate and is referred to the MLRO for a reporting decision. No customer contact beyond the generic acknowledgement until that decision is taken.
Evidence relied on	RSK-0010, REG-0010, EVP-0010
Escalation target	mlro.queue
Override?	no
Override direction	—
Override reason	—

H. Communications

Everything an applicant receives comes from `kb/message_template.csv`. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

This case carries a **restricted finding**, so only the generic templates - the ones that state no reason - were available to it.

Field	Value
Message	COM-0012
Template	TPL-0004
Situation	manual_review_underway
Audience	applicant
Type	manual_review_underway
Approval	approved, by K. Ohtla
Sent	sent

Hello Taavi Ruumet, your application for Solvarn Baltic OU (reference WAL-ONB-0012) is with our onboarding team for an additional manual review step. No further documents are needed from you at this time. We will contact you as soon as this step is complete.

I. Timeline

Every audit event on this case, oldest first - **50 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0012	Solvarn Baltic OU	sme_corporate	analyst_review_required	compliance	critical	70	1	sanctions_escalation (compliance)	0

The open holds in full:

Hold	Code	Owner	Placed by	Why
HLD-0009	sanctions_escalation	compliance	step.screening	a screening finding needs a compliance decision before the case moves

A **hold** is a lock. Only the step that placed it, or the named person it belongs to, can release it, and the case moves only when every hold is clear.

This case is marked **restricted**: customer messages are limited to generic templates.

WAL-ONB-0013 - Pemberly Tooling Ltd

Precision tooling and machine parts for light manufacturing · private_limited_company in GB, registered as UK-99034820 · expected usage: Up to 14 cards; around 21000 GBP per month on materials and freight

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	private_limited_company
programme_type	direct
ownership_layers	1
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct

Rule	Order	Condition in plain words	Would give	What happened
AT-02	2	entity type is one of sole_trader, freelancer, self_employed	freelancer_sole_trader	did not match: entity type was private_limited_company
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	did not match: ownership layers was 1
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	did not match: has corporate shareholder was False
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	did not match: has trust or nominee was False
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	MATCHED - this rule decided the case

Result: sme_corporate, **route** primary, **by rule AT-06**. Standard company with simple direct ownership

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
GB	UK	wallester_uk_ltd	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000191	RULE-0051	entity proof	certificate of incorporation	required	the company	—	—	accepted
CHK-000192	RULE-0052	entity proof	registry extract	required	the company	—	—	accepted

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0150	cert_incorporation_pemberly.pdf	certificate of incorporation	accepted_for_checks	accepted_for_checks	—	none fired	—	—

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0029	Hadley Winstock	director	1976-10-03	GB	GB
IND-0030	Marguerite Elcott	director	1983-06-21	GB	GB
IND-0031	Oswin Prattley	ubo	1970-12-09	GB	GB

The threshold is **25%**: at or above it, an owner must be verified.

Id	Owner	Control	Path	The multiplication	Declared	Verified?
UBO-0011	Oswin Prattley	direct shareholding	Pemberly Tooling Ltd	55% held directly	55%	verified

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

Provider	Company status	Result	Confidence	Attempts	Register corroborates the owners?
MockRegistryHub UK	active	pass	0.91	1	true

Each row compares what the register holds with what was read from the documents. The result is computed here by comparing the two columns, corrections included - it is not taken from the provider.

Compared	The register holds	Extracted from documents	Result
legal name	Pemberly Tooling Ltd	Pemberly Tooling Ltd	match
registration number	UK-99034820	UK-99034820	match
registered address	Unit 12 Pemberly Trading Estate, Coventry CV6 5NN, United Kingdom	Unit 12 Pemberly Trading Estate, Coventry CV6 5NN, United Kingdom	match
directors	Hadley Winstock, Marguerite Ellcott	Hadley Winstock, Marguerite Ellcott	match

Identity.

Check	Person	Document	Liveness	Biometric	Name/DOB	Expired	Duplicate	Result
IDC-0026	Hadley Winstock	fail	pass	fail	mismatch	false	false	fail
IDC-0027	Marguerite Ellcott	pass	pass	pass	match	false	false	pass
IDC-0028	Oswin Prattley	pass	pass	pass	match	false	false	pass

Screening. Internal only - none of this may be repeated to the applicant.

Check	Subject	Sanctions	PEP	Adverse media	Severity	Provider references
SCR-0036	the applicant entity	no_match	no_match	none	none	—
SCR-0037	Hadley Winstock	no_match	no_match	unavailable	medium	SCREEN-REF-MEDIA-UNAVAILA BLE-3301
SCR-0038	Marguerite Ellcott	no_match	no_match	none	none	—
SCR-0039	Oswin Prattley	no_match	no_match	none	none	—

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-01	jurisdiction_risk	ubo resident outside applicant country	not fired	0		—
RS-02	industry_risk	high risk industry	not fired	0		—
RS-03	ownership_complexity	ownership layers gt 1	not fired	0		—
RS-04	ownership_opacity	ubo not supported by registry	not fired	0		—
RS-05	registry_address_mismatch	registry address mismatch	not fired	0		—
RS-06	registry_director_mismatch	registry director mismatch	not fired	0		—
RS-07	entity_status	entity not active	not fired	0		—
RS-08	identity_verification	identity check failed	fired	+25	25	IDC-0026
RS-09	identity_verification	identity duplicate	not fired	0		—
RS-10	extraction_confidence	low confidence accepted as read	not fired	0		—
RS-11	extraction_confidence	field corrected by analyst	not fired	0		—
RS-12	usage_volume	expected monthly spend above 50k	not fired	0		—
RS-13	pep_exposure	pep match	not fired	0		—
RS-14	adverse_media_severity	adverse media moderate	not fired	0		—

Id	Factor	Condition	On this case	Points added	Running total	Evidence
RS-15	adverse_media_severity	adverse media serious	not fired	0		—
RS-16	sanctions_exposure	sanctions possible match	not fired	0		—
RS-17	sanctions_exposure	sanctions clear match	not fired	0		—
RS-18	document_quality	document resubmission required	not fired	0		—
RS-19	document_quality	document manual review	not fired	0		—

The arithmetic.

25 = 25

The factors above come to 25, but **this case carries no score at all**. An unresolved gap in the evidence means there is not enough to score: a number here would read as a risk level when the honest answer is that nobody knows yet. The band carries that instead.

What	Value
Score	—
Band the score alone would give	none - not scored
Hard floors that applied	insufficient_evidence_hold forces at least insufficient_evidence
Final band	insufficient_evidence
Recommended action	insufficient_evidence
Human sign-off required	yes

A **hard floor** is a rule that overrides the arithmetic. Where a floor applies, the band is guaranteed whatever the points say - which is why the score and the band can disagree.

G. Decision

kb/analyst_decision_taxonomy.csv says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band insufficient_evidence:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	not offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	not offered	medium, high, critical	analyst	rejected

Field	Value
Decision	insufficient_evidence
Recorded by	R. Toome (analyst)
Reason code	identity_failure_and_provider_non_answer
Rationale	One identity check failed and one media check did not return. Neither is an adverse finding and neither can be treated as a pass. Holding the case as insufficient evidence and requesting a current identity document from the director concerned.

Field	Value
Evidence relied on	RSK-0011, REG-0011, EVP-0011
Escalation target	—
Override?	no
Override direction	—
Override reason	—

H. Communications

Everything an applicant receives comes from `kb/message_template.csv`. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0013
Template	TPL-0002
Situation	clarification
Audience	applicant
Type	clarification_request
Approval	approved, by R. Toome
Sent	sent

Hello Hadley Winstock, we are completing the company checks for Pemberly Tooling Ltd (reference WAL-ONB-0013). The registered address held on the official company register does not appear to be the same as the address on the documents you submitted. Please confirm the current registered address and upload a document that shows it.

I. Timeline

Every audit event on this case, oldest first - **58 in total**. The actor says who acted: `system` for the orchestration, `ai_agent` for a model, `external_provider` for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0013	Pemberly Tooling Ltd	sme_corporate	analyst_review_required	system	insufficient_evidence	—	2	identity_failed (analyst); insufficient_evidence (analyst)	0

The open holds in full:

Hold	Code	Owner	Placed by	Why
HLD-0010	identity_failed	analyst	step.verification	1 verification outcome(s) need an analyst: ID-RESULT: Identity check for Hadley Winstock returned 'fail'
HLD-0011	insufficient_evidence	analyst	step.screening	a screening provider returned no result after a retry

A **hold** is a lock. Only the step that placed it, or the named person it belongs to, can release it, and the case moves only when every hold is clear.

WAL-ONB-0014 - Elise Kaarma

Studio ceramics and small-batch tableware · sole_trader in EE, registered as EE-FIE-4471208 · expected usage: One card; up to 1500 EUR per month on clay, glazes and kiln hire

A. Classification

Intake reads kb/applicant_type_rules.csv in priority order and takes the **first** rule whose conditions all hold. Later rules are never looked at.

The values this application was judged on:

Value	This application
entity_type	sole_trader
programme_type	direct
ownership_layers	0
has_corporate_shareholder	False
has_trust_or_nominee	False

Rule	Order	Condition in plain words	Would give	What happened
AT-01	1	programme type is exactly white_label	white_label_partner	did not match: programme type was direct
AT-02	2	entity type is one of sole_trader, freelancer, self-employed	freelancer_sole_trader	MATCHED - this rule decided the case
AT-03	3	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	not checked - an earlier rule already matched
AT-04	4	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-05	5	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	not checked - an earlier rule already matched
AT-06	6	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	not checked - an earlier rule already matched

Result: freelancer_sole_trader, route primary, by rule AT-02. Individuals trading on their own account (Section 5.1)

Jurisdiction and entity scope. kb/jurisdiction_routing.csv maps the applicant's country to a rule set and to the Wallester entity that would hold the relationship.

Country	Rule set	Entity scope	Supported	Rule
EE	EE	wallester_as	true	—

B. Checklist

Step 2 builds this from kb/requirement_rule.csv, taking every rule that applies to this applicant type, jurisdiction and entity type. A rule marked *required* must be satisfied before the paid checks in Step 5 will run. A *conditional* rule applies only when the application answers its condition yes; answered no, it is **waived**. An *optional* rule never blocks anything.

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000209	RULE-0001	entity proof	registry extract	required	the company	—	—	accepted
CHK-000210	RULE-0002	individual identity	id document	required	Elise Kaarma	—	—	accepted
CHK-000211	RULE-0003	individual identity	proof of address	required	Elise Kaarma	—	—	resubmission_requested

Item	Rule	Area	Document	Level	Applies to	Condition	Application's answer	Status
CHK-000212	RULE-0004	individual identity	liveness selfie	conditional	Elise Kaarma	remote onboarding without in-person verification	not answered	pending
CHK-000213	RULE-0005	source of funds	source of funds declaration	required	the company	—	—	accepted
CHK-000214	RULE-0006	business model	business activity description	required	the company	—	—	accepted
CHK-000215	RULE-0007	risk specific	website or platform details	optional	the company	—	—	pending

Totals

Level	Items	Accepted	Waived	Still outstanding	Which
required	5	4	0	1	proof of address
conditional	1	0	0	1	liveness selfie
optional	1	0	0	1	website or platform details

C. Documents

Step 3 screens every uploaded file against `kb/document_quality_rules.csv`. A *deterministic* check is arithmetic on the file - its type, its dates, its page count. An *ai* check is a judgement about the image. The KB decides what each failure means: back to the customer, or to an analyst.

Id	File	Type	Verdict at the screen	Status now	Flags	Rule that fired	Reason code	Analyst release
DOC-0164	ee_fie_registry_extract_kaarma.pdf	registry extract	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0165	id_card_kaarma_e.jpg	id document	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0166	poa_kaarma_screenshot.jpg	proof of address	resubmission_required	resubmission_required	screenshot_not_original	QR-09 (ai)	document_unreadable	—
DOC-0167	source_of_funds_kaarma.pdf	source of funds declaration	accepted_for_checks	accepted_for_checks	—	none fired	—	—
DOC-0168	business_activity_kaarma.pdf	business activity description	accepted_for_checks	accepted_for_checks	—	none fired	—	—

Extracted fields. Step 4 reads only documents that passed the screen. The confidence floor is **0.70**: a value below it, or missing, goes to a person before it can be used in any decision.

Field	From	Name	Value	Confidence	How it was handled
FLD-0250	ee_fie_registry_extract_kaarma.pdf	company_name	Elise Kaarma	0.96	above the floor
FLD-0251	ee_fie_registry_extract_kaarma.pdf	registration_number	EE-FIE-4471208	0.95	above the floor
FLD-0252	ee_fie_registry_extract_kaarma.pdf	registered_address	Vabriku 31-2, 10411 Tallinn, Estonia	0.93	above the floor
FLD-0253	ee_fie_registry_extract_kaarma.pdf	entity_status	active	0.94	above the floor
FLD-0254	id_card_kaarma_e.jpg	full_name	Elise Kaarma	0.95	above the floor
FLD-0255	source_of_funds_kaarma.pdf	declared_source	Studio sales and commissioned tableware	0.90	above the floor
FLD-0256	business_activity_kaarma.pdf	declared_industry	Studio ceramics	0.92	above the floor

D. People and ownership

A *beneficial owner* is the person who ultimately owns or controls the applicant. Where the holding runs through another company, the percentage is multiplied along the chain rather than read off any one document.

Id	Name	Role	Date of birth	Nationality	Resident in
IND-0032	Elise Kaarma	sole trader	1994-08-23	EE	EE

The threshold is **25%**: at or above it, an owner must be verified.

No beneficial owners are declared on this case.

E. Checks

Step 5 and Step 6 are the paid steps. They run only once every required checklist item is accepted, which is why a case held at Step 3 or 4 has nothing here.

Registry.

No registry check was run: the case did not reach the paid step.

Identity.

Nothing to show.

Screening. Internal only - none of this may be repeated to the applicant.

Nothing to show.

F. Risk

Step 7 walks every factor in `kb/risk_scoring_matrix.csv` and adds the points for the ones whose condition is true on this case. The table below shows **all** of them, fired or not, so you can see what was considered and not only what counted.

This case never reached Step 7, so it has no score and no band.

G. Decision

`kb/analyst_decision_taxonomy.csv` says which decisions exist at which band and who may record them. A decision outside the band is never offered; a decision the person's role does not allow is refused when they try to record it.

At band `insufficient_evidence`:

Decision	Severity rank	At this band	Allowed at	Role needed	Resulting status
approve	1	not offered	low, medium	analyst	approved
conditional_approve	2	not offered	low, medium	analyst	approved
withdrawn	3	offered	low, medium, high, critical, insufficient_evidence	analyst	closed_withdrawn
request_more_information	4	offered	low, medium, high, insufficient_evidence	analyst	analyst_review_required
insufficient_evidence	5	offered	insufficient_evidence	analyst	analyst_review_required
enhanced_due_diligence	6	not offered	medium, high, critical	analyst	enhanced_due_diligence
escalate	7	not offered	high, critical	compliance	analyst_review_required
reject	8	not offered	medium, high, critical	analyst	rejected

No decision has been recorded on this case.

The case closed because the applicant stopped replying. That is something that happened to the case, not a judgement anyone made about it, so there is no decision row.

H. Communications

Everything an applicant receives comes from kb/message_template.csv. The wording is the template's; only its declared placeholders are filled, from facts a customer may be told. Every rendered message is scanned for restricted wording before it can be sent.

Field	Value
Message	COM-0014
Template	TPL-0001
Situation	resubmission
Audience	applicant
Type	resubmission_request
Approval	approved, by ops.queue
Sent	sent

Hello Elise Kaarma, thank you for your application for Elise Kaarma (reference WAL-ONB-0014). To continue we need the following items: proof of address. Please upload them in the onboarding portal. If anything is unclear, reply to this message and our onboarding team will help.

Field	Value
Message	COM-0015
Template	TPL-0005
Situation	reminder
Audience	applicant
Type	status_update
Approval	approved, by ops.queue
Sent	sent

Hello Elise Kaarma, we have received your application for Elise Kaarma and all of the documents we asked for. Your case reference is WAL-ONB-0014. Your application is now with our onboarding team and we will let you know as soon as the review is complete.

Field	Value
Message	COM-0016
Template	TPL-0012
Situation	case_closed
Audience	applicant
Type	case_closed
Approval	approved, by ops.queue
Sent	sent

Hello Elise Kaarma, we have not heard back about the documents we asked for, so we have closed your application for Elise Kaarma (reference WAL-ONB-0014) for now. Nothing is held against you and you are welcome to apply again whenever it suits you.

I. Timeline

Every audit event on this case, oldest first - **25 in total**. The actor says who acted: system for the orchestration, ai_agent for a model, external_provider for a paid check, and a person's name for a human decision. The version column is the knowledge base or model that was in force.

J. Dashboard line

Exactly what the operations dashboard shows for this case. A dash in Band or Score means the case never reached risk scoring - it is not a score of zero.

Case	Applicant	Type	Status	Owner	Band	Score	Holds	Hold detail	Age (days)
WAL-ONB-0014	Elise Kaarma	freelancer_sole_trader	closed_withdrawn	system	—	—	0	—	0

Appendix - the knowledge base

Every rule the pipeline follows lives in a CSV under kb/. Changing a rule is an edit to one of these files and a version bump in kb/kb_manifest.json - no code change and no release. This appendix prints them as they stand at **kb-2026.09-poc-v10**.

Applicant-type rules

Checked in priority order. The **first** rule whose conditions all hold decides the applicant type, and the rest are never evaluated - which is why the order matters as much as the conditions.

Order	Rule	Condition in plain words	Applicant type	Route	Why it exists
1	AT-01	programme type is exactly white_label	white_label_partner	white_label_branch	White-label programme partners are identified but not decided in the first POC (Sections 3 and 6.2)
2	AT-02	entity type is one of sole_trader, freelancer, self_employed	freelancer_sole_trader	primary	Individuals trading on their own account (Section 5.1)
3	AT-03	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and ownership layers is greater than 1	complex_corporate_ubo	primary	Indirect ownership chain needs enhanced UBO handling (Sections 5.1 and 14.4)
4	AT-04	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has corporate shareholder is true	complex_corporate_ubo	primary	A company owns part of the applicant
5	AT-05	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp and has trust or nominee is true	complex_corporate_ubo	primary	Trust or nominee arrangements need explanation (Section 5.2)
6	AT-06	entity type is one of private_limited, private_limited_company, public_limited, partnership, llp	sme_corporate	primary	Standard company with simple direct ownership

The last rule has no extra condition, so every company reaches it eventually. It only ever wins because the rules above it were tried first.

Jurisdiction routing

The applicant's country decides which rule set applies and which Wallester entity would hold the relationship.

Country	Rule	Rule set	Entity scope	Supported	Notes
DE		EE	wallester_as	true	
EE		EE	wallester_as	true	
FI		EE	wallester_as	true	
FR		EE	wallester_as	true	
GB		UK	wallester_uk_ltd	true	
IE		EE	wallester_as	true	
LT		EE	wallester_as	true	
LV		EE	wallester_as	true	
NL		EE	wallester_as	true	

Risk scoring matrix

Each factor adds its points when its condition is true on the case. **Every weight is a POC placeholder** - the brief does not state them, so they were set so the scripted dataset reproduces, and each carries that status in the file itself.

Id	Factor	Reads from	Condition in plain words	Points	What it means	Weight status
RS-01	jurisdiction_risk	individual	ubo resident outside applicant country	8	A beneficial owner lives outside the country the applicant is registered in	poc_placeholder - Wallester to confirm
RS-02	industry_risk	registry check	high risk industry	12	The register or the declared activity marks this as a higher-risk industry	poc_placeholder - Wallester to confirm

Id	Factor	Reads from	Condition in plain words	Points	What it means	Weight status
RS-03	ownership_complexity	ubo	ownership layers gt 1	15	Ownership runs through at least one intermediate company	poc_placeholder - Wallester to confirm
RS-04	ownership_opacity	finding	ubo not supported by registry	25	The register does not corroborate the declared beneficial ownership	poc_placeholder - Wallester to confirm
RS-05	registry_address_mismatch	finding	registry address mismatch	30	The registered address on file does not match the register	poc_placeholder - Wallester to confirm
RS-06	registry_director_mismatch	finding	registry director mismatch	12	The declared directors do not match the register	poc_placeholder - Wallester to confirm
RS-07	entity_status	finding	entity not active	60	The register does not show the entity as active	poc_placeholder - Wallester to confirm
RS-08	identity_verification	identity check	identity check failed	25	An identity check returned fail or review for a director, owner or signatory	poc_placeholder - Wallester to confirm
RS-09	identity_verification	identity check	identity duplicate	25	An individual appears to duplicate someone already known to us	poc_placeholder - Wallester to confirm
RS-10	extraction_confidence	extracted field	low confidence accepted as read	6	A value was read below the confidence floor and accepted as read by an analyst	poc_placeholder - Wallester to confirm
RS-11	extraction_confidence	extracted field	field corrected by analyst	5	An analyst had to correct a value the system could not read reliably	poc_placeholder - Wallester to confirm
RS-12	usage_volume	applicant	expected monthly spend above 50k	8	Expected monthly card spend is above the 50000 threshold	poc_placeholder - Wallester to confirm
RS-13	pep_exposure	screening check	pep match	30	A subject is a politically exposed person or a close associate	poc_placeholder - Wallester to confirm
RS-14	adverse_media_severity	screening check	adverse media moderate	20	Moderate adverse media of relevance to a subject; allegations, not established fact	poc_placeholder - Wallester to confirm
RS-15	adverse_media_severity	screening check	adverse media serious	40	Serious adverse media of relevance to a subject; allegations, not established fact	poc_placeholder - Wallester to confirm
RS-16	sanctions_exposure	screening check	sanctions possible match	60	A possible sanctions match that only a human can resolve	poc_placeholder - Wallester to confirm
RS-17	sanctions_exposure	screening check	sanctions clear match	70	A confirmed sanctions match	poc_placeholder - Wallester to confirm
RS-18	document_quality	document	document resubmission required	10	A document failed the quality screen and had to be sent back	poc_placeholder - Wallester to confirm
RS-19	document_quality	document	document manual review	15	A document was held for an analyst at the quality screen	poc_placeholder - Wallester to confirm

Risk bands and hard floors

A band is either a score range, or a **hard floor** - a condition that forces a minimum band whatever the score says. Where a floor applies, the score explains the case and the floor decides it.

Bands by score

Id	Band	From	To	Recommended action	Notes
RB-01	low	0	24	approve	Nothing outstanding. Still requires a human decision; there is no automatic approval
RB-02	medium	25	49	conditional_approve	Something to resolve, but nothing that stops the application

Id	Band	From	To	Recommended action	Notes
RB-03	high	50	79	enhanced_due_diligence	Enhanced due diligence before any decision
RB-04	critical	80	100	escalate	Compliance decision required

Hard floors

Id	What triggers it	Forces at least	Recommended action	Why
RB-10	entity not active	high	reject	A blocking registry failure is an eligibility failure: no amount of further diligence changes the answer, so the recommendation is to reject whatever the score
RB-05	sanctions clear match	critical	escalate	A confirmed sanctions match is critical whatever the score
RB-06	sanctions possible match	critical	escalate	An unresolved possible sanctions match is critical whatever the score
RB-07	pep match	high	enhanced_due_diligence	A PEP match is at least high whatever the score
RB-08	adverse media serious	high	enhanced_due_diligence	Serious adverse media is at least high whatever the score
RB-09	insufficient evidence hold	insufficient_evidence	insufficient_evidence	An unresolved gap in the evidence. The case is not scored: there is not enough to score

Decision taxonomy

Which decisions exist, where they are offered, who may record them, and how strict each one is. The **severity rank** is what lets the system work out whether a reviewer was stricter or more lenient than the recommendation, without anyone having to say so.

Decision	Severity rank	Allowed at bands	Role needed	Reason required	Resulting status	Customer template
approve	1	low, medium	analyst	true	approved	TPL-0007
conditional_approve	2	low, medium	analyst	true	approved	TPL-0007
withdrawn	3	low, medium, high, critical, insufficient_evidence	analyst	true	closed_withdrawn	TPL-0012
request_more_information	4	low, medium, high, insufficient_evidence	analyst	true	analyst_review_required	TPL-0002
insufficient_evidence	5	insufficient_evidence	analyst	true	analyst_review_required	TPL-0002
enhanced_due_diligence	6	medium, high, critical	analyst	true	enhanced_due_diligence	TPL-0004
escalate	7	high, critical	compliance	true	analyst_review_required	TPL-0004
reject	8	medium, high, critical	analyst	true	rejected	TPL-0011
